1. Land legislation in the Republic of Kazakhstan is based on the Constitution of the Republic of Kazakhstan and consists of this Code and adopted in accordance with regulations of the Republic of Kazakhstan.

2. Relations on the use and protection of mineral resources, water, air, forests and other vegetation, wildlife, environmental objects that have special ecological, scientific and cultural value of protected areas are governed by special legislation of the Republic of Kazakhstan. K070212, Z060175

3. Implementation of the subjects of land relations of their rights should not harm the earth as a natural resource and other objects of the environment, as well as the rights and legitimate interests of others.

4. Privities of possession, use and disposal of land, as well as transactions with them are regulated by civil legislation of the Republic of Kazakhstan, unless otherwise stipulated by the land, environmental, forest, water legislation of the Republic of Kazakhstan, the Republic of Kazakhstan law on subsoil on plant and animal life , and specially protected natural areas.

5. Statutory rights of individuals and legal entities can not be limited to acts of public authorities.

6. Foreigners, stateless persons and foreign legal persons shall enjoy the rights and obligations in land relations on an equal basis with citizens and legal persons of the Republic of Kazakhstan, unless otherwise provided by this Code or other laws of the Republic of Kazakhstan.

7. Land-use right of other states on the territory of the Republic of Kazakhstan appears in accordance with international treaties ratified by the Republic of Kazakhstan.

Footnote. Article 6, as amended by the Law of RK as of January 9, 2007 N 213 (the order of entry into force See Art. 2).

Article 7. International treaties

If an international treaty ratified by the Republic of Kazakhstan stipulates other rules than those contained in this Code, the rules of the treaty. International treaties ratified by the Republic of Kazakhstan, to land relations are applied directly, except in cases when an international agreement, it follows that its application requires the promulgation of legislation.

Article 8. Zoning of land

1. Zoning - Define land area to establish their purpose and usage.

2. Organization of zoning on the regional level (city of republican status, capital) areas (cities of regional importance) to implement the authorized bodies of oblasts (city of republican status, capital) areas (cities of regional significance). Draft (design) zoning be approved by the representative bodies of oblasts (city of republican status, capital) areas (cities of regional significance).

Classifier earmarked land is developed on the basis of projects (schemes) zoning and approved by the local executive bodies (cities of republican status, capital), districts (cities of regional significance).

3. (excluded - by the Law of RK as of January 10, 2006 N 116

4. Target mode of using the territory defined in the zoning of the land is for the subjects of land relations binding.

5. Zoning of land held by a decision of local executive bodies and at the expense of budget funds.

Article 9. Payments for land

1. Plots of land owned, land-use or permanent primary gratuitous temporary use, subject to land tax in accordance with the laws of the Republic of Kazakhstan.

2. For lands granted by the state in temporary paid land-use (lease) fee for the use of land.

Calculation and payment to the budget payment for land use is determined in accordance with the laws of the Republic of Kazakhstan.

In granting the territory of the Republic of Kazakhstan, the land on lease to other States the fee for land use is determined by international treaties ratified by the Republic of Kazakhstan.

3. Provision of land from state ownership to private is made on a reimbursable basis through the sale of a lump sum or in installments by the decision of the local executive body area (city of republican status, capital), region (city of regional significance), mayor of the city district level, town, village (village) , aul (rural) counties within its jurisdiction to provide the land, except in cases where land ownership is provided at no charge:

1) citizens of the Republic of Kazakhstan - the owners of premises as an ideal share in the condominium facilities;

2) citizens of the Republic of Kazakhstan for the conduct of private farming, horticulture, individual housing and suburban development in accordance with paragraph 2 of Article 50 of this Code;

2-1) research centers with international participation, defined in the manner prescribed by the Government of the Republic of Kazakhstan;

2-2) of domestic enterprises listed by the Government of the

Republic of Kazakhstan;

3) in other cases stipulated by this Code and the laws of the Republic of Kazakhstan.

The fee for the provision of gratuitous (sale) of private ownership of land (hereinafter - the fee for land) or temporary paid land-use rights (hereinafter - the payment for the sale of lease rights) is calculated on the basis of land (appraised) value, calculated on the base rates of payment for plots with the use of correction factors.

4. Funds received from the sale of the state of agricultural land in private ownership, transferred to the National Fund and are used in the legislation of the Republic of Kazakhstan.

5. When you change the purpose of land, gratis for personal subsidiary farming, horticulture, individual housing and dacha construction, under a different purpose for which this Code provides pay provision of land, the land owner shall pay to the budget an amount equal to the land (estimated) value of the land under the laws of the Republic of Kazakhstan for the amended purpose.

When you change the purpose, except for land seized for public use, agricultural land plot, as well as agricultural use within the features of the settlement for its use for purposes not connected with agriculture and forestry, the owner of this land is obliged to pay budget an amount equal to the difference between the land (estimated) value under the laws of the Republic of Kazakhstan for the amended purpose, and the price at which the site was previously purchased from the state.

6. Land and land-use right in the form of state natural grants are provided to a legal entity of the Republic of Kazakhstan, is carrying out the investment project, in accordance with this Code and laws of the Republic of Kazakhstan on investments.

Decision of the local executive body of the region (city of republican status, capital), region (city of regional significance) on the provision of land as in-kind grant was adopted within its competence to make land available to the decision of the authorized body for investment.

7. When selling or leasing land owner, selling non-state land-user right to use land owned by him to others, as well as at the time they land on lease secondary users of the land size, timing and form of payment for the land determined by the agreements of sale or tenancy in accordance with the civil legislation of the Republic of Kazakhstan.

8. Land can be granted in payment of the authorized capital (property) socio-entrepreneurial corporations with the status of a national company at a price, calculated on the land (estimated) value of the land.

In this case, registration of land ownership in the socio-entrepreneurial corporations with the status of a national company, made after the state registration of authorized shares.

**Article 10. Base rates of payment for land and inventory
(estimated) cost of land**

1. Base rates of payment for land for their provision to private ownership, leasing the state or state land lease and the fee for the sale of lease rights established by the Government of the Republic of Kazakhstan at least once a year. In this case, the rate of payment for the use of land set no lower than the rates of land tax.

Fee for sale of lease rights to establish different from the land (estimated) cost of a specific plot.

2. Cadastral (estimated) cost of a particular land is determined by the specialized state-owned enterprises, leading the state land cadastre, in accordance with the basic rates of payment for land plots allocated on a reimbursable basis to private ownership or leased by the state, with an application to them of the correction (raising or lowering) coefficients and executed an act of determining the land (estimated) value of the land approved by the competent authority areas (cities of republican status, capital), region (city of regional significance) within the jurisdiction of local executive bodies of oblasts (city of republican status, capital) areas (cities of oblast values) to make land available.

Base rates of payment for land plots allocated to private property in human settlements (towns and villages), located in suburban cities of Astana and national significance, the regional centers and resort area is doubled.

3. Cadastral (estimated) cost of the additional land granted to the citizens of the Republic of Kazakhstan in private ownership for the conduct of private farming, gardening and dacha construction beyond the established norms for the free transfer, is determined based on the basic rates of payment for land plots in rural settlements closest to the assessed sites.

4. On land located outside the line of settlements, provided (provided) to citizens and non-governmental entities for construction and the built buildings (constructions) and their complexes, including land intended for building maintenance (buildings and facilities) in accordance with their appointment, inventory (estimated) value is determined based on the amount of ten percent of the base payment rates for land plots allocated (provided) for these purposes in the cities of regional importance.

5. In determining the land (estimated) value of land referred to in paragraphs 3 and 4 of this Article shall apply correction factors for the remoteness of these areas from the centers of the service sector in accordance with paragraph 3) of paragraph 4 of Article 11 of this Code.

Article 11. Correction factors to base rates of payment for land

1. Correction factors and border zones in the cities of district value, towns and rural settlements are approved by decision of the district representative body at the suggestion of the local executive body of the district, and in the cities of regional importance (the city of republican status, capital) - the regional (city of republican status, capital), a representative body at the suggestion of the local executive body area (city of republican status, capital).

At the same time limit (maximum) size of the step-up or step-down ratio should not exceed twice the size.

2. In determining the land (estimated) value of land provided by the state for agricultural production, apply a correction factor (increase or reduction) depending on the qualitative status of the land, its location, water availability, distance from service centers.

3. Qualitative state of the land by type of land and soil types installed on the basis of land cadastral maps, materials, soil, geo-botanical, soil reclamation and other surveys:

1) to determine the value of land used as part of arable land, depending on the reclamation condition and slope surface, the following correction factors:

reclamation of land:

Good (non-saline soil and non-stony, non branched, depth of groundwater: fresh water - more than 3 m of mineralized - more than 6 m) - 1,2;

satisfactory (slightly saline soils, weakly, stony;

depth of brackish groundwater 3-6 m) - 0,9;

unsatisfactory (soil moderately and strongly, medium and strong salt licked, stony, medium and bad; depth of groundwater mineralization over 1 g / L - less than 3 m) - 0,6;

slope surface:

1 ° - 1, 1 to 3 degrees - 0,98, 3 to 5 degrees - 0,96, 5 to 7 degrees - 0,93; more than 7 degrees - 0,86;

2) to determine the value of land used as part of the natural grassland (meadows, pastures), depending on their quality and condition of the slope of the surface area, the following correction factors:

improved hay meadows and pastures:

radical improvement, with the sowing of perennial grasses - 1,2;

Surface improvements without changing the species composition of vegetation - 1,1;

state land occupied by hayfields:

Good (land clean, without habitation, non-stony with distinct features of the zonal vegetation) - 1,2;

satisfactory (land littered, non branched, forested,

rocky with violations of the zonal structure of vegetation. These symptoms manifest themselves on the area to 40 percent of the territory) - 0,9;

unsatisfactory (land littered, non branched, forested, rocky with violations of the zonal structure of vegetation. These symptoms appear on more than 40 percent of the territory) - 0,7;

slope surface:

3 degrees - 1, from 3.1 to 6 degrees - 0,95; from 6.1 to 10 degrees - 0.9, from 10.1 to 20 degrees - 0,85; more than 20 degrees - 0,5;

state land occupied by pastures:

Good (land clean, non branched (non eating shrubs) non habituated, non-stony with distinct features of the zonal vegetation) - 1,2;

satisfactory (land littered, branched (non-eating bushes), wooded, rocky with violations of the zonal structure of vegetation, the presence of bad pastures, denuded marshes, salt-licks steppes. These symptoms manifest themselves on the area to 40 percent of the territory) - 0,9;

unsatisfactory (land littered, branched (eating bushes), wooded, rocky with violations of the zonal structure of vegetation, the presence of bad pastures, denuded marshes, salt-licks steppes. These symptoms appear on more than 40 percent of the territory) - 0,6;

slope surface:

12 degrees - 1, from 13 to 20 degrees - 0,8; over 20 degrees - 0,6.

4. To determine the value of land, depending on watering the land, its location in relation to the economic center, distance of land from the centers of the service sector, the following correction factors:

1) watering (water) Land area:

inundated - 1,2; non- ground watering - 0,8;

2) the location of the land in relation to the economic center, in kilometers:

five - 1,2; from 5 to 10 - 1 10 to 20 - 0,9; from 20 to 30 - 0,8; over 30 - 0,7;

3) remoteness of the land from service centers depending on the quality of roads:

Distance, km!	Roads with a firm Coated!	with gravel roads	Groundwater road
until 20	1,4	1,1	0,7
21-40	1,2	0,9	0,6
41-60	1,0	0,7	0,5
61-80	0,8	0,5	
81-100	0,6		
Over 100	0,5		

5. If there are several factors that increase or lower the inventory (estimated) value of the land, the coefficients are multiplied.

The total size of increase or decrease the land (estimated) value of the land for agricultural production shall not exceed fifty percent of the base payment rates established in accordance with paragraph 1 of Article 10 of this Code.

Article 12. The basic concepts used in the Code

In this Code the following definitions:

1) exemption - the action of public authorities, aimed at ending a private owner or land ownership or land use rights to land on the terms and conditions stipulated by this Code;

4. Expropriation for public use of land granted for temporary land use, if granted the right not purchased by the state land user, shall without compensation of land use

rights. Land users reimbursed losses in full, and at their request may be granted to another land.

Article 85. Ransom of land plot

1. Expropriation of land for public use from the owners and private land, if land-use right by them were purchased, according to the procedure of redemption in accordance with this Code, and in part not regulated by them, other laws of the Republic of Kazakhstan.

2. The owner of the land or non-state land user must be no later than one year prior to the upcoming redemption of such a section in writing notified the body that made the decision to purchase, unless otherwise stipulated by the laws of the Republic of Kazakhstan.

Redemption of land before the expiration of the year from the date of receipt of the owner or non-landholder such notification only with the consent of the owner or private landholder, unless otherwise stipulated by the laws of the Republic of Kazakhstan.

Article 86. The rights of the owner or private landholder land for Expropriation for public use

The owner of the land user or non-state land for expropriation for public use, after receiving notification of the decision to repurchase up to an agreement on price or a court decision on the repayment of such a plot owned by him may exercise the right to land and make the necessary expenditure to ensure Use of this site in accordance with its designated purpose. In this case, the land owner or land user bears the risk of non-state classification for his costs and losses associated with new construction, expansion or renovation of buildings (structures, installations) on this plot of land in the period.

If the land owner or land user after the non-governmental expropriation for public use of the land cannot be used to continue the remainder of the intended purpose, then bought out the entire plot.

Article 87. The price for the redeemed land

1. The price for the land, redeemable for expropriation for public needs, timing and other terms of repayment are determined by agreement with the owner of the land or non-governmental stakeholders.

Price for agricultural land (excluding losses), the owner of the land acquired by the state in accordance with subparagraph 2) of paragraph 2 of Article 24 of this Code and redeemable for expropriation for public use is determined for the amount paid by the state.

In case of partial payment of the amount of land

(excluding losses), sold by the State in installments, and bought it for expropriation for public needs redeemed the land price determined in the amount paid by the amount.

2. In determining the price for the redeemed the land by expropriation for public purposes it includes the market value of land or rights thereto, and the on immovable property at the time of cessation of ownership or land use, as well as all losses in full, caused by the land owner or non-land user in connection with the compulsory acquisition of land, including the losses that it incurs in connection with the early termination of obligations to third parties.

The market value of land determined in accordance with Kazakhstan legislation on valuation activities.

3. By agreement with the owner of the land or non-land user may be provided instead of land redeemed for expropriation for public needs, another plot of land provided by offsetting the cost of land or rights to it in the redeemed value of the land or rights to it in the market value at the time of cessation of ownership or land use.

In cases where the expropriate for public purposes land or a right to it must have been purchased by the state, but the ransom was not produced, the market value of the land is not included in the price, in agreement with the private landholder may be granted instead of the other land of equal site.

Article 88. Redemption of land by court order

If the owner or non-state land user disagrees with the decision to purchase his land for public needs, or with no agreement on the price of the redeemed land or other terms of redemption, the local executive authority which decided on redemption may bring a lawsuit on redemption of the land.

Such action may be brought after one year but not later than two years from the date of the owner of the land user or non-site notification referred to in paragraph 2 of Article 85 of this Code, unless otherwise provided by legislative acts of the Republic of Kazakhstan.

The land owner or land user has the right to non-state challenge in court the decision of the local executive body of the redemption of his land (land use rights).

Article 89. Withdrawal of land from state land for public use

Seizure of land from state land for public needs is based on a unilateral decision by the executive body which carries out the removal.

Such a decision may be appealed to a higher authority or by the courts. Filing an appeal suspends the execution of the decision on seizure.

Article 90. Restriction of individual seizures of land categories

Withdrawal of irrigated agricultural land, the land of experimental fields of research and education of agricultural, biological and irrigation and drainage, fishery profile, Forestry and Water funds allowed only in exceptional cases involving the establishment and expansion of protected areas, implementation of international obligations, the detection under section deposits of valuable minerals, building roads, power lines, communication lines and pipelines, engineering and communication networks, public communities, as well as objects of state significance, in the absence of other possible options for their placement.

Article 91. Temporary withdrawal of land in cause of emergency

1. In the event of disaster, martial law, accidents, epidemics, epizootics and other emergency situations, the land in the public interest by the decision of local executive bodies may be temporarily withdrawn from the owner or land with compensation for his losses. Assessment, on which the owner or land user offset losses may be challenged in court.

2. Upon termination of an emergency land to be returned to the owner (land), and there is a dispute he is entitled to its return to the court.

3. If you cannot return to the land owner or land user reimbursed for the cost of land or land-use rights.

4. The order of requisition of property, including real estate, the temporary seizure of land by the norms of civil legislation of the Republic of Kazakhstan.

Article 92. Forced withdrawal of land plot from the owner and landholder not used for intended purpose

In cases where the land intended for farming or housing or other construction, is not used for appropriate purposes within two years (unless a longer period is provided by the laws of the Republic of Kazakhstan), then such land shall be subject to forced removal from the owner and land user in manner specified in Article 94 of this Code. During this period does not include the time required for the development of such a plot, and the time within which the plot could not be used for the intended purpose because of natural disasters or due to other circumstances precluding such use. Conditions and terms of development plots set in the order determined by the Government of the Republic of Kazakhstan.

Article 93. Forced withdrawal land plot from the owner

and landholder used in violation of laws Republic of Kazakhstan

In cases where the use of land is carried out in gross violation of the rules of rational use of land established by this Code or other laws of the Republic of Kazakhstan, in particular, if the land is not used in accordance with the purpose or its use significantly reduces the fertility of agricultural lands or significantly deterioration of ecological conditions, after application of penalties under the legislation of the Republic of Kazakhstan on Administrative Offences, a plot of land subject to compulsory withdrawal from the owner or land in the manner provided in Article 94 of this Code.

In the cases stipulated by part one of this article, the land owner or land user is required to reimburse the State for damage in accordance with civil legislation of the Republic of Kazakhstan, except in cases arising under force majeure circumstances (force majeure).

Article 94. The order of compulsory retirement of land the site is not used for any purpose used in violation of laws Republic of Kazakhstan

1. Requisitioning of land from the owners and users of land referred to in Articles 92 and 93 of this Code shall be made in court at the suit of the territorial authority on land management area (city of republican status, capital) at the location of the land.

2. A claim for compulsory seizure of land in the case provided for in Article 92 of this Code may be instituted only after written notice of the owner or land user of the need to use the land for the purpose, made no less than a year before suing, and provided that during this time the land owner or land user has not taken the necessary steps to use this site for its intended purpose.

3. A claim for compulsory seizure of land in the case provided for in Article 93 of this Code may be instituted only after the application of penalties under the legislation of the Republic of Kazakhstan on Administrative Offences, and written notice of the land owner or land user of the need to eliminate violations of the law of the Republic of Kazakhstan, made no less than three months prior to the presentation of the claim and provided that during this period land owner or land has not been resolved violations of the law of the Republic of Kazakhstan to use the site.

If a violation of the law of the Republic of Kazakhstan land owner or land user was to use this site inappropriately, the territorial authority on land management area (city of republican status, capital), region (city of regional significance), mayor of the city district level, town, village

(village), aul (rural) district to a claim of compulsory withdrawal must submit proposals to the local executive body of the region (city of republican status, capital), region (city of regional significance), governor of the city district level, town, village (village) aul (rural) districts for the location of the site to change its purpose at the request of land owner or land. Claim in this case can only be brought under negative decision on changing purpose of this site.

4. In the case of forced removal from land owner or land by the court on the grounds specified in Articles 92 and 93 of this Code, the ownership of land or land-use right (with respect to the state treasury lease rights to land) is sold at auction (tenders auctions) in the manner prescribed by the civil procedural and executive legislation of the Republic of Kazakhstan.

Proceeds minus the cost of compulsory seizure of land paid to former land owner or land user. When it is impossible the implementation of such land or land use rights on him after less than three tenders (auctions) within one year the land shall be entered by the court in a special land fund.

Article 95. Confiscation

In the cases stipulated by legislative acts of the Republic of Kazakhstan, the land can be freely withdrawn from the owner or land in court as a sanction for committing a crime or other offense.

Not subject to confiscation needed to convict and those dependent on him, land belonging to the convict on the right of private property or which it shares in common ownership, which accommodate a house and outbuildings, as well as land plots necessary for the conduct of private farming according to the list provided for the criminal-executive legislation of the Republic of Kazakhstan.

The confiscated land returned to state ownership. Implementation or continued use of such land, or land use rights, which is subject to forfeiture may be made in accordance with the legislation of the Republic of Kazakhstan.

Article 96. Score plot termination of ownership or land use rights

Upon termination of ownership or land use land or land-use right is assessed at market value.

Section 3. Categories of land

Chapter 10. Agricultural land

Article 97. The concept and composition of agricultural land

1. Agricultural lands are lands granted for agricultural purposes, or intended for these purposes.

2. As part of the agricultural lands allocated agricultural land and land occupied by on-farm roads, communications, closed bodies of water, land reclamation network, buildings and structures necessary for the functioning of agricultural and other lands (salt licks, sand, steppes and other miscellaneous land, interspersed with a tracts of agricultural land).

3. Agricultural lands are subject to special protection. The use of these lands for purposes not related to agricultural production, is allowed in exceptional cases (Article 90 of this Code).

On land provided by individuals and legal entities for agricultural production, farm or farm, and field allotments private farming is not allowed the construction of facilities not related to agriculture, including residential houses (including the solo). In this case, the construction of livestock farms, temporary buildings and domestic buildings for seasonal work and pastures for cattle grazing on agricultural lands cannot use valuable agricultural land, which includes all kinds of irrigated agricultural land, arable land, fallow and the land occupied by perennial plants.

3-1. Not allowed partition of agricultural land, owned or land-use areas, areas which are below the minimum established in accordance with paragraph 5 of Article 50 of this Code.

4. To agricultural land include: arable land, fallow, land, permanent crops, hay fields and pastures.

Arable land - land that systematically processed and used for sowing of crops, including perennial grasses, as well as fallow. For arable land does not include hayfields and pastures occupied by pre-sowing crops (for a period not exceeding three years), tilled to a radical improvement, as well as between rows of gardens, used for sowing.

Deposit - the land, which had previously been a part of arable land and more than one year, beginning in the fall, is not used for planting crops, and is not prepared under par.

Perennial plantations - land used for artificial tree, shrub perennial plants designed to produce a crop of fruit and berries, technical and medicinal products, as well as for decorative areas.

Natural hayfields and pastures - land, systematically used for haying and grazing animals.

Hay meadows and pastures radical improvement - areas of grasslands and pastures, which was created by tinned new grass.

Flooded pastures - pastures, in which there are water

sources (lakes, rivers, ponds, digging irrigation canals or watering, pipe or water wells) to provide water of good quality suitable livestock.

5. Farmland can be irrigated and rainfed.

For irrigated agricultural land are land suitable for agricultural use and irrigation, with a permanent or temporary irrigation system connected to a source of irrigation, water resources, which provide irrigation of the land sink no lower than 75 percent of security in the optimal timing for the project or the current standards for irrigation rates current efficiency of the system.

Liman irrigation lands are areas where there are water-retaining walls, water-regulating dams and other waterworks, ensuring retention and redeployment to the area of these plots of melt water and spring floods, and water fed from irrigation or watering of channels for soils.

6. Agricultural land available:

1) in private ownership to citizens of the Republic of Kazakhstan for the development of private farming, gardening and dacha construction;

2) to private property or land to individuals and legal entities of the Republic of Kazakhstan for conducting a country or farm, commercial farming, afforestation, research, experimental and educational purposes, of a subsidiary agriculture, horticulture and animal husbandry;

Term of the land by right of land use for these purposes is not less than five years, providing the land for less than five years without the consent of the applicant interested in obtaining one;

3) for foreigners and stateless persons in temporary land under lease for 10 years.

7. In order to state control over the quality of agricultural land transferred to the land use and ownership of citizens and legal entities is a passport of agricultural land on the basis of materials of soil, soil reclamation, geobotanical surveys and soil evaluation at the expense of budget funds.

The form of the passport of agricultural land approved by the central competent authority for land management.

Organization of work on the passport of the land and its issuance of implementing the competent authorities of the regions (cities of republican status, capital) areas (cities of regional importance) at the location of the land.

Article 98. Order of transfer of agricultural land from one type to another

1. The need for translation (transformation) of agricultural land from one type to another is justified by natural factors, the economic expediency of their further use in other lands.

2. The basis of the translation work of agricultural land from one type to another may be the application of the land owner or land, filed the appropriate local executive bodies on the location of the land, as well as an initiative of the local executive body.

3. Funding for land management works to transfer agricultural land from one type to another, mandated by the local executive body, is due to the budget, and at the request of land owners and land users - at their means.

4. Translation of agricultural land from one type to another can be done on land, a group of sites, irrigation, land use.

Availability of agricultural land, land-reclamation conditions that require their translation into other types of land, previously established based on a review of available planning and cartographic materials, projects, land management, reclamation of construction, materials, soil, land reclamation, geo-botanical surveys, surveys of salt, the data of land cadastre , land inventory.

5. The grounds for the transfer of more valuable agricultural land in the less valuable are:

for arable land - Inconsistency agroindustrial soil characteristics of land to their actual use, high levels of contamination by toxic substances;

for perennial plantings - the age limit for plantations, their sparse growth of threes, poor species composition, unfavorable soil characteristics of land reclamation;

for hay - desertification, degeneration of the meadow vegetation, deterioration of reclamation status of lands;

for pastures - bad condition.

When transferring the irrigated land in rainfed addition to meeting the above factors are taken into account the loss of communication with a source of irrigation, non watering, technical state of on-farm irrigation systems, and for land irrigation lagoon - termination of flooding due to drainage or lack of redistribution of water resources, the technical condition of buildings.

If necessary, the local executive authorities may impose, and other indicators of transfer of valuable agricultural land in the less valuable: the minimum productivity of agricultural lands, the level of salinity, alkalinity, soil contamination and other criteria affecting the qualitative characteristics of land.

6. Proceedings of the transfer of farmland from one species to another must include:

An explanatory note with the conclusions and proposals; explication of land that were being transferred from one species to another;

the act of drawing and field survey with the mapping of identified agricultural lands, subject to transformation; qualitative characteristics of land;

information about the technical condition of irrigation networks, liman irrigation, watering facilities and fixed assets.

7. Proceedings of the transfer of farmland from one species to another are transferred to the authority area to summarize the area, aligning them with the district authorities of Agriculture and Water.

8. The authorized body area with the conclusion drawn up taking into account suggestions bodies listed in paragraph 7 of this article, send the materials for translation:

less valuable agricultural land from one species to another - in the regional executive authority for final decision;

irrigated land in the irrigated, non-irrigated arable land in other less valuable species of agricultural land - in the authority area to coordinate with the regional authorities of Agriculture and Water Resources, Environment.

9. According to the results matching authority area summarizes material for the whole region and with its conclusion directs them:

Translation non-irrigated arable land in the less valuable types of agricultural land - in the regional executive authority for final decision;

Translation of irrigated arable land in the irrigated land types - to agree to a central authority.

10. Central authority for land management agrees submissions on translation of irrigated arable land in non-irrigated land species with the central competent authorities for agriculture, the environment and with their generalized conclusion directs the regional executive body for a final decision on the matter.

11. Decision to transfer less valuable agricultural land into more valuable Takes (city) executive body, taking into account the proposals bodies listed in paragraph 7 of this article.

Article 99. The use of irrigated engineering prepared land

1. By engineering and irrigated lands are trained engineers planned land, specially prepared for cropping, equipped with irrigation, drainage systems and structures that are running a science-based scheme of alternation (rotation) of crops.

2. Interleaving scheme (rotation) crops on irrigated land claims trained engineers local executive body of the region (city of republican status, capital), region (city of regional significance). Plots associated with the unified scheme of rotation (rotation) crop irrigation and drainage system shall be deemed indivisible. This rule also applies to the land distributed to the entry into force of this Code, from the

irrigated lands of trained engineers.

3. Using previously distributed engineering and irrigated land prepared and recognizes the indivisibility carried out on the right of common (shared, joint) property (in common (share, share), land use), and separating the share in kind is not allowed. The co-owners at the exit from the membership has the right to pay him the value of his share of other participants in common ownership or sell it to another person in accordance with rules established by paragraph 2 of Article 55 of this Code.

4. Land owners and land users in the irrigated lands of trained engineers are required to comply with the established pattern of alternation of crops, to undertake the necessary reclamation and restoration work, including those contained in the proper order is available on site irrigation and drainage system.

5. Violation of the requirements imposed by paragraph 4 of this article shall entail the measures of administrative penalty under the laws of the Republic of Kazakhstan on Administrative Offences (irrational use of agricultural land), and can also serve as the basis for the forced removal of the land in accordance with the provisions of Article 93 of this Code.

Article 100. Special land fund

1. In order to redistribution of land among agricultural producers formed a special land fund at the expense of agricultural lands and reserve lands. In a special land fund are not included parcels of land whose condition is not possible to grow agricultural products that comply with sanitary standards and requirements.

2. Special land fund formed by the plots of agricultural land, coming into the fund:

- 1) upon the voluntary renunciation of the land;
- 2) for compulsory seizure of land in accordance with Articles 92, 93 and 95 of this Code;
- 3) if there are no heirs either by law or by will, or none of the heirs did not accept the inheritance, or all the heirs of the testator are deprived of inheritance, an heir refused the inheritance in favor of the state, or renounced succession without specifying in favor of whom he refuses to inheritance .

3. Inclusion of land listed in paragraph 2 of this article in the special land fund made by the decision of the executive body of the county (city).

4. The inclusion of a special land fund land not used for the intended purpose or used in violation of the laws of the Republic of Kazakhstan on state land on the basis of unilateral decision of the district (municipal) executive body.

Decision of the district (municipal) executive body may be appealed in the manner provided for in Article 89 of this Code.

5. Prior to the transfer of land to new owners and users of the land they used the same state land on the terms and conditions established by district (city) executive body.

6. Land use of a special land fund shall be in accordance with Article 97 of this Code.

Citizens who came from the state agricultural organizations, whose lands are not subject to partition, has not previously vested right to a conditional land share residing in the territory, as well as repatries have priority right to obtain land from the lands of special land fund for the conduct of a peasant or farm or other activities related to agricultural production.

7. Land allocation of a special land fund performed in the order land, usually a single array and with the creation of facilities in land use.

8. Data on land in special land fund are publicly available.

Earth special land fund accounted for as reserve land, except as provided for in paragraph 5 of this article.

Article 101. Land plots for farm or farming

1. To maintain farm or farm land available to citizens of the Republic of Kazakhstan on the right of private ownership or the right of temporary paid land-use up to 49 years, and for the conduct of transhumance (seasonal pastures) on the right of temporary grant of land use in accordance with this Code and the laws of the Republic of Kazakhstan the peasant or farm.

Preferential right to obtain land for conducting a country or farm enjoyed by citizens, who will run the economy based on personal labor participation, with special agricultural knowledge and skills with practical experience in agriculture and living in this district, town, village (village) , township.

2. Citizens are coming out of the reorganized state agricultural organizations to conduct farm or farm land available from these organizations plots, cadastral valuation of which shall be at the secondary level in the household (by land).

In case of application of topsoil on marginal or unproductive land at the expense of legal or natural person who is granted the land, the loss shall be compensated by offsetting the amounts spent on the restoration of land, in the manner determined by the Government of the Republic of Kazakhstan.

5. Dimensions loss agreed with the person interested in giving him the land, and drawn up the act, which is approved the decision of the local executive authority to grant rights to land.

6. Losses, caused by the deterioration of soil quality, are determined as a percentage of standards in proportion to decrease in quality of land (according to the cadastral valuation of lands) in cases not connected with their transfer from one type to another.

In the event of a transfer of some types of land in the other in connection with the deterioration of the quality of the size of losses is determined by the difference ratios for the respective types of wetlands.

7. Compensation for losses caused by the deterioration of soil quality as a result of the impact caused by the activities of organizations and citizens, is produced in court at the suit of the authorized body area (city of republican status, capital), region (city of regional significance) at the location of the land.

Chapter 11. Earth of settlements

Article 107. The concept and composition of land settlements

1. Land plots allocated for the development of cities, towns, villages, towns and other settlements belong to the category of land settlements.

2. Earth settlements distinguished from lands other administrative-territorial formations city limits, the village below, below village " .

3. The composition of land settlements may include land:

1) residential buildings, occupied buildings and buildings designed for multifamily and multistory apartment buildings and individual dwellings with household plots;

2) social business development, occupied and used for placement of medical facilities, culture, trade, catering, domestic services, commercial activities, as well as pre-school organizations, secondary, technical and vocational post-secondary and higher education, administrative, scientific research institutions , religious buildings and other business houses, buildings and structures;

3) industrial buildings, occupied and intended for industrial, municipal and warehouse facilities to ensure their functioning, the engineering and transport infrastructure, and to establish protective buffer zones of these facilities;

4) transportation, communications, utilities, occupied and used for construction of railway, road, river, sea, air and pipeline transport, highways engineering and communication infrastructure;

5) Protected Areas, recreation, recreational, historical and cultural destination;

6) waters and waters occupied by rivers, natural and artificial ponds and water areas, water protection zones, hydro and other water facilities;

7) agricultural use;

8) the public engaged in and intended to engage in squares, streets, sidewalks, passages, roads, promenades, parks, urban forests, parkways, lakes, beaches, cemeteries and other facilities designed to meet the needs of the population (water pipes, heating ducts , treatment plants and other engineering systems of common use);

9) Reserve and others who are not involved in planning activities designed for territorial development of the settlement and development of private farming;

10) special-purpose allocations to accommodate the crematoria, cattle cemetery, landfill waste and other objects whose use is impossible without the establishment of special regulations and rules;

11) provided for the needs of defense and other usage.

4. The assignment of land to public lands in the lands of settlements, as well as exclusion from the land of common use in connection with a change of purpose made by the local executive bodies in accordance with their competence.

Article 108. Establishing and changing boundaries (Features) settlements

1. Establishing and changing boundaries (line) settlements are made on the basis of duly approved planning documentation for the joint proposal of the relevant bodies of land, architecture and planning.

2. Border (line) of the cities and the capital of the Republic of Kazakhstan established and changed by the President of the Republic of Kazakhstan on presentation of the Government of the Republic of Kazakhstan.

3. Border (line) cities of regional importance are controlled by joint decision of the regional representative and executive bodies in consultation with the Government of the Republic of Kazakhstan.

4. Border (line) Urban District values are controlled by joint decision of the regional representative and executive bodies.

5. Border (line) of towns and villages (villages) are controlled by joint decision of the district (urban) and executive bodies.

6. Inclusion of land in the city, town, village does not imply the cessation of ownership or land use rights to these plots.

Article 109. Use of land settlements

1. All the land of cities, towns, rural settlements are used in accordance with their master plans, project planning and construction and project management of land and economic unit area.

In settlements with a population of more than 5,000 people in the absence of duly approved master plans for land use is permitted with a simplified scheme of the master plan of development and construction of this settlement or the duly approved town planning documents.

2. Plots of land of common use may be made available to citizens and legal persons for temporary land use for placing the facilities of lightweight type (stalls, kiosks, advertising structures and other objects of the service) without prejudice to the public. In this case, the provision of plots of land from the public, including roadside (streets, driveways), to accommodate the market, paid parking (parking lots), with the exception of paid parking (parking lots), located in the bands challenge streets of the capital of Kazakhstan, According to a law on the status of the capital of

Kazakhstan is not allowed.

Plots of land of common use may be granted to private property only after their expulsion from the land of common use.

Land plots of agricultural land use settlements cannot be granted the right of private property for conducting farm or farming, commercial farming, afforestation, maintenance of subsidiary agriculture, horticulture and animal husbandry.

3. From the lands of the public engaged in and intended for the cemetery, on each of the deceased resident of the settlement or a person with no fixed abode, who died in this settlement, for the disposal of free land is allocated no less than six square meters.

Article 110. Suburbs

1. In the land of the suburban areas may include land outside the city limits that make the city a single social, environmental and economic territory.

2. In suburban areas by zoning with separation zones of intense suburban development of agricultural production, much of urban management (reserve areas for urban development, deployment and construction of facilities necessary for the normal functioning of the engineering and transport infrastructure), green areas, covered by forests, parks and other green plantings that perform protective and hygienic functions, and is home to public recreation.

3. The boundaries of the suburban areas of cities at district level are controlled local representative body of the proposal of the local executive body of the area.

The boundaries of the suburban areas of the city of republican status, capital cities and regional importance are controlled by the Government of the Republic of Kazakhstan on joint proposals of the local representative and executive bodies of the city of republican status, capital and provinces. The boundaries of the suburban areas of the city of republican status, capital is also consistent with the relevant local representative and executive bodies, whose territory included in the suburban area.

4. Inclusion of land in the country side does not entail the termination of property rights and land use rights of these lands.

5. Order and use of land included in a suburban area, are defined by who established the country side.

Order and use of land included in the suburban area of the city of Astana and republican cities, determined by the Government of the Republic of Kazakhstan on joint proposals and executive bodies of these cities agreed with the respective regional representative and executive bodies, whose territory included in the suburban area.

Chapter 12. Land of industry, transport, communications, defense and other non-agricultural destination

Article 111. The notion of land and industry, Transport, communications and other non-agricultural purposes

1. Lands of industry, transport, communication and other non-agricultural purposes are lands granted by this Code and other legislative acts of the Republic of Kazakhstan citizens and legal persons for the relevant purpose.

2. Features of land use in industry, transport, communication and other non-agricultural purposes shall be established by special legislation of the Republic of Kazakhstan.

Article 112. Industrial land

1. Lands of industry include the lands provided for the deployment and operation of industrial facilities, including their health and safety and other areas.

2. The size of land plots allocated for these purposes shall be determined in accordance with the duly approved rules or the project design document, and the lands shall be based on the sequence of their development.

Article 113. Land of transport

1. Transport lands are lands granted for the activity and (or) the operation of road, sea, inland waterway, rail, air and other modes of transport.

2. In order to create conditions for development, construction and reconstruction of road, sea, inland waterway, rail, air and other modes of transport can be reservation land in accordance with the legislation of the Republic of Kazakhstan on the Transport.

Article 114. Earth of rail

1. Lands for the needs of railway transport include lands designated for:

1) Trunk road and technologically related structures and facilities (railroad track, bridges, tunnels, viaducts, signal equipment, service and technical buildings);

2) access roads;

3) train stations (stations) of buildings, structures of power, locomotives, wagons, track and truck farms, water supply and sanitation, protection and fortification stands, office and other objects having special significance for the maintenance of railway transport;

4) the right of way and buffer zones of the railways;

5) rail tracks and rail facilities under a concession

agreement.

2. Plots of land for the needs of rail transport are provided in accordance with the project design documentation and the plan for development of railways and railway stations, according to the standards approved in the prescribed manner.

3. In order to ensure public safety and the safe operation of facilities on land adjacent to the ROW land for rail transport, established buffer zones with special conditions of land, within that limit or prohibit those activities which are incompatible with the purposes of establishing zones .

4. In the security area of rail transport include: protective forest strip of land needed to ensure safety, strength and stability of structures, devices, and other transportation facilities, as well as land adjacent to the ROW railway, located in the mudflow, landslide-prone zones and places subject to other adverse effects.

Security zones can be established without the withdrawal of land from land owners and land users.

Article 115. Earth of road transport

1. Lands for the needs of road transport include lands set aside:

1) under the roads, their design elements and road construction and technology-related buildings and structures;

2) for placement of bus stations and bus stations and other facilities of road transport and road facilities required for operation, maintenance, construction, reconstruction, repair of surface and underground buildings, structures, devices;

3) to establish the rights of way of highways.

2. Land under the ROW for the needs of road transport are provided on the basis of established norms, depending on the category of roads, and according to project documents.

3. To ensure public safety and creating conditions of use of roads to meet the requirements of road safety are in the form of roadside adjacent to both sides of the bands challenge public highway land to the establishment of a special regime for their use. Referred to the land withdrawal from land owners and land users are not subject.

4. At the roadside strips and bands withdrawal of public roads is prohibited construction of capital facilities, except for objects of road service and road service facilities.

Article 116. Earth of marine and inland water transport

Lands for the needs of the maritime and inland waterway transport are lands reserved for the placement of sea and river ports, piers, docks, waterworks and other facilities required for operation, maintenance, construction,

reconstruction, repair of surface and underground buildings, facilities, equipment and other objects of maritime and inland waterway transport.

Article 117. Earth of air transport

To land for the needs of air transport are lands reserved for the placement of airports, airfields, airports, runways and other surface facilities necessary for operation, maintenance, construction, reconstruction, repair, development of surface and underground buildings, structures, devices and other air transport facilities and their protective zones.

Security zones can be established without the withdrawal of land from land owners and land users.

Article 118. Earth of pipeline

To land for the purposes of pipeline transportation are lands reserved for the placement of pipelines, gas pipelines, oil pipelines and facilities necessary for operation, maintenance, construction, reconstruction, repair of surface and underground buildings, structures, devices, and other pipeline transportation facilities. To these lands as conservation zones are pipelines to the particular conditions of use of land whose boundaries are determined based on building codes, rules of pipelines and other regulatory documents, duly approved.

Security zones can be established without the withdrawal of land from land owners and land users.

Article 119. Earth of communications and energy

1. To land for the purposes of communication, broadcasting, TV, computer are lands reserved for the placement of objects relevant infrastructures, cable, microwave and air lines of communication, including groundwater, and their protective zones.

2. Lands Energy includes land reserved for:

1) placement of hydropower, nuclear power plants, power plants and other plants that serve their facilities and equipment, and facilities that use renewable energy;

2) placement of overhead power lines, ground facilities of cable lines, substations, distribution stations and other facilities and power facilities.

To ensure public safety and creating conditions of operation of power facilities and communication can be established buffer zones of power grids and communication lines on the basis of building regulations, the rules for protection of power grids and communication lines and other regulatory documents, duly approved.

Article 120. Land for defense purposes

1. Lands for defense purposes are recognized land

provided by the Government of the Republic of Kazakhstan for the placement and constant activity of military units, military sites, military schools and other organizations of the Armed Forces, other troops and military formations, their objects and structures, performing tasks in the field of defense and security.

2. If necessary, the temporary use of land for training exercises and other activities related to defense needs, land from land owners and land are not withdrawn.

The use of these lands is carried out in relation to the procedures prescribed for conducting exploration work and for areas with special conditions of use.

Permission to use the land for these purposes gives the regional executive body.

3. In order to ensure the protection and preservation of the State Border of the Republic of Kazakhstan land allocation for development and maintenance of engineering facilities and fences, border markers and border clearings, communication, checkpoints across the state border of the Republic of Kazakhstan. P050771

4. Regional executive authorities in consultation with the troop units can send individual plots of land allocated for defense purposes, the temporary land use legal entities and individuals for agricultural use.

Article 121. Zones with special conditions for land use

1. In order to ensure public safety and creating the conditions necessary for the operation of industrial, transport and other facilities are installed zone, within which limit or prohibit those activities which are incompatible with the purposes of establishing zones.

2. For areas with special conditions for land use include:

- 1) sanitary-protective zones of industrial enterprises;
- 2) mudflow, landslide and protective forest areas adjacent to the ROW railways and roads;
- 3) protective zones of water intake facilities;
- 4) bands of airports;
- 5) protection zones of pipelines, communication lines, radio installation and electricity;
- 6) protection zones;
- 7) the territory of military sites.

3. The land included in the zones with special conditions, marked on the ground with special signs. Specified land may not be withdrawn from land owners and land users, except for the first belt zone of water intake facilities.

4. The boundaries of these zones and the use of land in them are determined by the body that made the decision to grant land ownership or land use, in accordance with the standards and design and technical documentation.

Chapter 13. Earth of protected territories, lands of recreation, recreational and historical and cultural target

Article 122. Land of protected Natural Areas

1. Lands Protected areas are lands of state natural reserves, national natural parks, state natural reserves, national regional natural parks, public zoological parks, public botanical gardens, public parks and public dendrological natural monuments.

Plots of state conservation areas and national wildlife refuges are allocated as part of other categories of land without their removal from land owners and land users and accounted for in the management of state land cadastre.

Restrictions within the territory of the state of conservation areas and national wildlife refuges in any activity prejudicial to the state and restoration of ecological systems of these protected areas and those on board of the state natural reserve fund shall be made encumbrance on the land owners and land users and accounted for in land management documentation.

2. Earth's protected areas are state owned and not subject to privatization.

Withdrawal of lands of specially protected natural areas for other purposes is not allowed.

Agricultural lands in the lands of specially protected natural areas used for agricultural production, may be granted for such purposes citizens of the Republic of Kazakhstan, living in settlements located within the boundaries of protected areas, in accordance with the legislation of the Republic of Kazakhstan.

Transfer of lands of specially protected natural areas is not allowed, except transfer to reserve lands for the construction and operation of tourism, under state programs, in the absence of other possible options for their placement, and only those sites on which mode is limited economic activity, with a positive conclusion of state ecological examination in the manner prescribed by the Government of the Republic of Kazakhstan.

3. Specially protected natural areas can be used for scientific, cultural, educational, tourist and recreation, limited economic purposes on such terms and conditions stipulated by the legislation of the Republic of Kazakhstan.

To carry out cultural activities in protected natural areas may be established museums, lectures, exhibitions, demonstration sites and other necessary facilities.

To conduct tourism and recreation in protected natural areas are allocated special areas, which are equipped with hiking trails, observation decks, bivouac clearings, parking

for vehicles, campsites, campgrounds, hotels, motels, tourist bases, catering, trade and other cultural domestic purposes.

Tourism and recreation activities in protected natural areas is limited in view of protection regime and governed in accordance with the laws of the Republic of Kazakhstan.

The use of specially protected natural areas in the limited economic purposes may be permitted only at designated sites with custom mode and controlled mode of economic activity.

Article 123. Earth's protective zones of protected natural areas

1. To provide special protection and protection from adverse environmental impact around the protected areas are established buffer zones to the prohibition, and (or) restrictions within these zones, any activity prejudicial to the state and restoration of ecological systems of these protected areas and those on board facilities State nature reserve.

2. Dimensions, boundaries, types of treatment and the order of nature in the protected zones of state natural reserves, national natural parks, state natural reserves and state regional nature parks are determined by natural science and technical-economic justifications for their creation and established by decisions of the regional (city of republican value , capital) of the executive bodies in the manner prescribed by this Code and the Law of the Republic of Kazakhstan "On Specially Protected Natural Areas.

The width of the buffer zone, which is installed along the boundaries of land owners and land or natural geographic boundaries and designated areas for special signs shall be not less than two kilometers.

3. Plots within the protected zones of protected areas are used in compliance with the established regime of these zones and may be forcibly alienated for state needs in accordance with the conditions established by this Code.

Article 124. Classification of lands protected areas and reservation

Classification of land classified as protected areas and reservation of lands under the Protected areas are carried out in accordance with the laws of the Republic of Kazakhstan on Protected Areas.

Article 125. Earth recreational purposes

1. Lands recreational purposes include resorts, possessing natural medicinal factors, as well as land, favorable for the organization of prevention and treatment.

2. In order to maintain a favorable health and

environmental conditions for the organization of prevention and treatment of human disease in the lands areas recreational purposes shall be established by the sanitary-protective zones in accordance with the laws of the Republic of Kazakhstan.

Boundaries and modes of protection, sanitary protection and other protection zones land recreational purposes are determined by local representative and executive bodies.

3. Land parcels within the sanitary protection zones from land owners and land are not withdrawn, except if in accordance with established sanitary treatment provides a complete withdrawal of these lands from economic circulation (the first zone of sanitary protection zone). In this case, these plots expropriate, including through the purchase, for public use in accordance with the conditions established by this Code.

Use of land within the boundaries of the second and third zones of sanitary protection zones is carried out in compliance with the established regime of protection of these areas.

Article 126. Earth recreational

1. Recreational lands are lands that are intended and used for organized public recreation and tourist population.

2. In the land of recreational facilities may include land on which there are rest houses, resorts, camping, and of physical culture and sports, tourist centers, stationary and tented tourist camps, cottages fishermen and hunters, parks, hiking trails, trails, children's and sports camps, and other similar facilities. Lands of recreational facilities also include the land of suburban green areas.

3. The order and mode of land use recreational facilities are determined by local representative and executive bodies.

4. Use of trails and routes, established by agreement with land owners and land users may be based on the easement.

5. On the lands of recreational activity, not corresponding to their intended purpose.

Article 127. The land of historical and cultural purpose

1. Lands of historical and cultural value are recognized land under the objects of historical and cultural heritage, including historical and cultural monuments.

When developing areas to the land allocation must be carried out research work on the identification of sites of historical and cultural heritage.

In case of detection of objects of historical, scientific, artistic and other cultural value, land users are obliged to suspend the further conduct of the work and notify the competent body for protection and use of historical and cultural heritage.

Prohibited from conducting all types of work that may pose a threat to the existence of historical and cultural

heritage.

2. Plots assigned to the land of historical and cultural destination, from land owners and land are not withdrawn, except in cases stipulated by legislation of the Republic of Kazakhstan.

In order to ensure the protection of historical and cultural monuments are established buffer zones, control zones and development zones of the protected natural landscape on the grounds of historical and cultural destination in the order determined by the laws of the Republic of Kazakhstan.

The boundaries of protection zones, areas of management development and areas of protected natural landscape of historical and cultural heritage shall be approved by the local representative bodies (maslikhats) regions (cities of republican status, capital) to submit relevant local executive bodies.

The procedure for determining these zones and the use of land in them are determined by the authorized body for protection and use of historical and cultural heritage.

3. Within the protection zones, areas of management development and areas of protected natural landscape of the authorized body for protection and use of historical and cultural heritage can be applied to administrative measures on the grounds and in the manner envisaged by the legislation of the Republic of Kazakhstan on Administrative Offences.

Chapter 14. Lands of forest fund

Article 128. The concept and composition of forest lands

1. Lands of forest fund are recognized land covered with forests, and not covered with forest, but provided for the needs of forestry.

2. Earth's forest land consists of public and private forest funds.

3. Lands of the State Forest Reserves are lands covered with forests naturally occurring and artificial forests created by the state budget and not covered with forest land, provided land for permanent public organizations, leading forestry.

4. Lands of private forest lands are covered by artificial forests, agroforestry plantations, plantations of special purpose funds established by individuals and non-state entities, and agroforestry plantations, established by the budget for the lands granted to them in private ownership or long-term land use in accordance with this Code, with the purpose for afforestation.

Article 129. Provision of forest lands in land use for agricultural purposes

Not used for the needs of forestry, agricultural land on forest land can be granted physical and legal persons for agricultural purposes in accordance with forest legislation of the Republic of Kazakhstan.

Article 130. Restrictions on transfer of lands forestry in other categories Land

Translation of forest lands in the lands of other categories for purposes not connected with forestry, is carried out by the Government of the Republic of Kazakhstan.

Article 131. Compensation for loss of forest production

1. Forestry production losses caused by the withdrawal of forest land for their use for purposes not connected with forestry, or deterioration of soil quality due to the impact caused by the activities of individuals and entities must be reimbursed to the budget.

2. Compensation for loss of forest production is performed by persons who are granted plots of forest land for purposes not connected with forestry and agriculture.

3. Standards of compensation for losses forestry production caused by the withdrawal of forest land for use for purposes not connected with forestry and agriculture, established by the Government of the Republic of Kazakhstan.

Chapter 15. Earth's water fund

Article 132. The notion of land and water resources

Water fund lands are lands occupied by water bodies (rivers and equal to them canals, lakes, reservoirs, ponds and other inland waters, territorial waters), glaciers, wetlands, water management facilities to control runoff, located on a water source, as well as the land allocated under riparian strip these bodies of water and sanitary zones of water intakes of drinking water.

Article 133. Ownership of land water fund

1. Earth's water resources are state property.

2. Plots of land from the water fund, engaged in water management facilities (irrigation and drainage systems), inter-district (regional) and inter-farm (district) values, as well as irrigation facilities, catering to the land of one business entity may be the private property of citizens and non-state entities Republic of Kazakhstan in the case of privatization of these facilities.

3. Land under water management facilities listed in

paragraph 2 of this article, serving two or more land owners or land users are granted to them by common ownership or common land.

Article 134. Allocation of land for water protection zones and bars on the banks of reservoirs

1. On the banks of rivers, lakes, reservoirs, canals, inland waters, glaciers, wetlands, local authorities allocated land under the protection zones and strips.

2. Land use that are included under the protection zones and strips shall be in accordance with the requirements of water legislation of the Republic of Kazakhstan.

Article 135. Land allocation from the land of water fund

Plots of land from the water fund may be provided for temporary land use by local executive bodies in consultation with the authorized bodies of water resources management to individuals and legal persons for the purposes of agriculture, forestry, fishing, hunting, accommodation facilities that use renewable energy and other purposes do not contradict the main intended purpose of land.

Article 136. Procedure of using land of water fund

Land use water resources in a manner and under the conditions prescribed by this Code and the water legislation of the Republic of Kazakhstan.

Article 136-1. Procedure for transfer of lands of water fund lands of other categories

1. Transfer of lands of water fund in the lands of other categories in the cases of natural or artificial extinction or decrease the size of a water body and the withdrawal of lands of water fund for public use.

2. The decision to transfer land in the water fund lands of other categories adopted by the local executive body of the region (city of republican status, capital).

The decision to transfer land in the water fund lands of other categories, or to refuse to transfer of lands of water fund in the lands of other categories is made based on the conclusion of a special commission created by the local executive body of the region (city of republican status, capital) from among the deputies of local representative body, representatives of the territorial units authorized bodies in the field of environmental protection, use and protection of water resources, land resources management.

Chapter 16. Reserve lands

Article 137. Composition of reserve land

1. Reserve lands are all lands not granted to property or land under the jurisdiction of the district executive.

2. The land on which the test was nuclear weapons, are translated by the decision of the Government of the Republic of Kazakhstan in the reserve land. The legal regime of these lands is determined in accordance with Article 143 of this Code.

Article 138. Provision of reserve land

Reserve lands granted to the property or land for agriculture, industry and other purposes on such terms and conditions established by this Code. Translation reserve land in the other categories is carried out simultaneously with submitting them to the property or land.

Section 4. Land protection, state control, planning, monitoring and land cadastre

Chapter 17. Land Protection

Article 139. Aims and objectives of land protection

1. Protection of land includes the legal, institutional, economic, technological and other measures aimed at protecting the land as part of the environment, rational use of land, prevent unnecessary removal of land from agricultural and forestry traffic, as well as the restoration and improvement of soil fertility.

2. The objectives of land protection are:

1) prevention of degradation and disturbance of land, other adverse consequences of economic activity by encouraging environmentally sound production technologies and agroforestry, irrigation and other activities;

2) ensuring the improvement and rehabilitation of degraded or breach;

3) introduction of environmental standards in the practice of optimal land use.

Article 140. Land Protection

1. Land owners and land users are obliged to carry out actions aimed at:

1) protection of lands from depletion and

desertification, water and wind erosion, mudslides, flooding, waterlogging, salinization, drying, compaction, pollution, waste production and consumption, chemical, biological, radioactive and other harmful substances, from other processes of destruction;

2) protection against contamination of agricultural land quarantine plant pests and diseases, from the overgrown weeds, shrubs and low forests from other types of land degradation;

3) land reclamation, restoration of fertility, and other useful properties of land and timely involvement in its commercialization;

4) the removal, storage and use of topsoil in the works related to the violation of land.

2. In order to prevent land degradation, restore soil fertility and contaminated sites, as well as in cases where it is impossible to restore soil fertility of degraded agricultural land, land contaminated with chemical, biological, radioactive and other hazardous substances in excess of established standards of maximum allowable concentrations and maximum allowable level impacts of waste production and consumption, waste water, and land infested by quarantine pests and plant diseases, provides conservation lands in the manner prescribed by the Government of the Republic of Kazakhstan.

3. In order to promote the interest of land owners and land users in the rational use and conservation of land may be economic incentives for the protection and use of land in the manner prescribed by the budget legislation and the legislation on taxes.

Article 141. Standards of maximum permissible concentrations of harmful substances in soil

1. Standards of maximum permissible concentrations of harmful substances, harmful microorganisms and other biological pollutants in the soil, established to evaluate her condition in order to protect human health and the environment.

2. Specified standards approved in the manner prescribed by the legislation of the Republic of Kazakhstan.

Article 142. Environmental, sanitary and other special requirements the design and commissioning buildings (structures, installations) and other facilities affecting the condition of land

1. When location, design and commissioning of new and renovated buildings (structures, installations) and other objects, the introduction of new techniques and technologies affecting the status of the lands should be set and implemented measures to protect the land, enforced environmental, health and sanitation and other special

requirements (norms, rules, standards).

2. Evaluation of the negative impact on the land and the effectiveness of planned measures for their protection is based on state ecological expertise, and other public examinations, without a positive conclusion which prohibit the introduction of new techniques and technologies, implementation of programs of land reclamation, financing of construction (reconstruction) of buildings (structures, installations) and other facilities.

Article 143. The land affected by radioactive pollution and which were testing of nuclear weapons

1. Plots subjected to excess contaminated or otherwise threaten the lives and health of the population, cannot be transferred to the ownership, permanent or temporary land use.

2. Plots of land affected by radioactive contamination, which is not available from products in accordance with the established laws of the Republic of Kazakhstan and sanitary requirements and standards, are excluded from agricultural use and should be preserved. Agricultural production on these lands and its implementation are prohibited.

3. The land on which the test was nuclear weapons, may be provided by the Government of the Republic of Kazakhstan in the property or land only after completion of all activities in the aftermath of nuclear weapons testing and integrated environmental study in the presence of a positive conclusion of state ecological expertise.

4. Events in the aftermath of nuclear weapons tests in these territories provided for in the republican and regional programs for environmental protection and management of land resources and other special programs.

5. Procedure for compulsory acquisition and land protection, radioactive contamination, determined by the laws of the Republic of Kazakhstan.

Chapter 18. State control for land use and protection

Article 144. Tasks of state control for land use and protection

Problem of state control are to ensure compliance with land legislation of the Republic of Kazakhstan state bodies, individuals, legal entities and officials to identify and address violations of the law of the Republic of Kazakhstan, the restoration of violated rights of citizens and legal entities, compliance with land use rights, the correct land cadastre and land management and implementation of measures on rational use and protection of land.

Article 145. Organization and procedure of implementation of state control over the using of and protection of lands

1. State control over land use and protection exercise central authority for land management and its territorial agencies, as well as other authorized bodies within their competence.

2. Other state bodies exercising state control over land use and protection are:

authority in the field of environmental protection;
government agencies sanitary-epidemiological service;
authority for architecture, urban planning and construction;

authority in the field of agriculture, forestry, hunting and fisheries, protected areas, use and protection of water resources;

authority for the use and protection of mineral resources.

3. State control over land use and protection takes the form of checks and other forms.

State control is also carried out during inventory surveys of land development schemes and projects related to land use, conduct inventories and monitoring of public lands.

Verification is carried out in accordance with the Law of the Republic of Kazakhstan "On private entrepreneurship." Other forms of state control exercised in accordance with this Code.

4. Excluded by the Law of RK as of 17.07.2009 N 188-IV

5. State control is performed by checking with the participation of land owners, land users, and in case of failure - without them, as a relevant note in the drawing from the survey instruments.

Revealed violations of land legislation drawn up the act with the accompanying drawings of the field survey, signed by the specialists who carried out these works, and transferred to a body whose competence is to examine the question.

Authorized bodies of the violations of land legislation dealt with in accordance with their functions in the manner determined by the legislation of the Republic of Kazakhstan on Administrative Offences.

6. Solving the state inspectors on use and protection of lands to impose an administrative penalty may be appealed in accordance with paragraph 3 of Article 148 of this Code.

7. The state inspectors on use and protection of land have control over the actual elimination of violations of land legislation of the Republic of Kazakhstan, as well as the implementation of the owners of land plots and land guidance and instructions of officials exercising state control over land use and protection.

8. For the implementation of state control over land use and protection authorized bodies of the regions (cities of

republican status, capital), districts (cities of regional value) annually to the respective territorial authorities on land management areas (cities of republican status, capital) a list of land owners and land users which this year granted plots of land, and land and cadastral map showing the location of such land, as well as on a monthly basis - information on the changes that have occurred in the list of land owners and land users.

Article 146. Officials carrying out state control for land use and protection

1. To officials exercising state control over land use and protection include:

- 1) The Chief Inspector of land use and protection of the Republic of Kazakhstan;
- 2) chief state inspectors of land use and protection of the relevant administrative-territorial units;
- 3) state inspectors on use and protection of land.

2. Guide government control over land use and protection exercises Chief Inspector of land use and protection of the Republic of Kazakhstan.

Chief State Inspector of land use and protection of the Republic of Kazakhstan is head of the central authorized body on land management.

Heads of territorial bodies of land management areas (cities of republican status, capital) are the principal state inspectors on use and protection of lands of the relevant administrative-territorial units.

Main state inspectors on use and land protection are forms of documents with the State Emblem of the Republic of Kazakhstan and its name.

Chief state inspectors and state inspectors on use and protection of lands granted in the prescribed manner and print identity.

3. Specifying the authority conducting the state control on the use and protection of land within its competence are obligatory for all state agencies, land owners and land users.

Article 147. Functions of the authority conducting the state control for land use and protection

1. Body carrying out state control over land use and protection, organizes and conducts state control over:

- 1) compliance with state bodies, enterprises, institutions, organizations and citizens of the land legislation of the Republic of Kazakhstan, the established regime of land use in accordance with their intended purpose;
- 2) prevention of unauthorized occupation of land;

Chapter 21. FINAL AND TRANSITIONAL PROVISIONS

Article 169. The procedure for applying this Code

This Code applies to land legal relations arising after its entry into force.

Adopted prior to enactment of this Code, regulations governing land relations, apply to the extent not inconsistent

with this Code.

Article 170. Transitional provisions

1. Citizens and private legal entities of the Republic of Kazakhstan, which granted land to the right of temporary land use for the conduct of a peasant or farm and commodity agricultural production, have the right to buy land in private ownership in the manner and conditions prescribed by this Code.

2. Citizens and private legal persons transferring belonging to them on the right of land plots in the secondary land use (sublet) for conducting a country or farm and commodity agricultural production, must, before 1 January 2005 to terminate contracts for secondary use (sublease).

In this case, these individuals have the right to independently engage in activities on the conduct of a peasant or a farm or commercial agricultural production or transfer the land as a contribution or contribution to the charter capital of economic entities.

In the case of non-realization of these rights landlords termination of the secondary land use (sublease) and termination of rights of land users (landlords) are carried out in the courts at the suit of the authorized bodies of national importance (the capital), districts (cities of regional significance), and the land transferred to the secondary land use, shall be seized and transferred to a special land fund of the district.

3. Citizens and private legal entities of the Republic of Kazakhstan, previously bought from the state the right of permanent land use (the right long-term land-use) of land plots for farm or farm and commodity agricultural production in accordance with the laws in force at the time of the transactions since the enactment of this Code become owners of land without additional charge for the acquisition of private property rights within the limits of land established by this Code.

Exercising the right of private ownership of land by such persons in accordance with paragraph 3 of Article 24 of this Code.

4. Holders the right to conditional land share, which were previously transferred their rights to rent, must, before 1 January 2005 to implement this right by committing one of the following acts in a manner and under the conditions provided in this Code:

- 1) buy land in private ownership;
- 2) a temporary common or separate land plot for self-reference of a peasant or a farm or commercial farming;
- 3) transfer as a contribution to the charter capital of an economic partnership, in return for shares of joint stock company or as a contribution to a production cooperative.

In this case, the selection (formation) of land at the

expense of conditional land shares in the procedure of land management.

Since the inception of ownership of land or land use rights earlier agreements (lease rights to and conditional land share lease (land grant) of land at the expense of leased shares) are forfeited.

5. Holders of conditional land shares, transferred the rights belonging to them as a contribution to charter capital of a business partnership or as a contribution in the production cooperatives, and withdrawal from the participants (members) to form a peasant or a farm are entitled to apportionment (section) in-kind interest or unit, including land. In this case a land plot from the land of agricultural organizations, which are pledged, shall be permitted with the consent of the mortgagee or the obligations secured by the lien on the land at the time allocated.

Private land in kind is not produced during the agricultural field work, except where such apportionment is made with the consent of the agricultural organization or participating in the common property (common land).

In this case, the location allocated in kind of land is determined in the manner prescribed by the constituent documents of economic companies, production cooperatives, or agreement of the parties. In the absence of allotment of the order (section) of land in the founding documents may apply the provisions of paras 3 and 4 of Article 101 of this Code.

6. If the holder of the conditional land share, owned handed him the right to lease, not implement the right to receive land during the period specified in paragraph 4 of this article, his right to a conditional land share is no longer valid, and the land on account of unrealized conditional land shares by the decision of the district (city) executive body is credited to a special land fund of the district.

7. All disputes related to the right to conditional land share, are considered by the court.

8. Agricultural land, immediately adjacent (3-km zone) to the protected zone of the State Border of the Republic of Kazakhstan, available only to citizens and legal entities of the Republic of Kazakhstan on the right of temporary land use to their delimitation and demarcation, unless otherwise stipulated by the legislation of the Republic of Kazakhstan on state border .

9. And identification documents of title to land granted to citizens and legal persons before the entry into force of this Code in accordance with previous legislation of the Republic of Kazakhstan remain valid in view of changes in land rights established by the land legislation of the Republic of Kazakhstan.

Replacing these documents to the documents certifying the right of ownership or land use on land, in accordance with

this Code, shall at the request of copyright holders.

President
Republic of Kazakhstan
